PROGRAM INDEX OF VOLUME 12

Astrophysics

Issue	*Page*	*Cat.no.*	
2	205	AAID	COLLRAD (Fortran). COLLRAD: a code for calculating the quasi—steady state population densities of excited states of hydrogen—like ions. G.J. Tallents.

Atomic Physics

2	199	ACWU	TANGO (Fortran). Multistate molecular treatment of atomic collisions in the impact parameter approximation. III — Integration of coupled equations and calculation of transition amplitudes for Coulomb trajectories. R.D. Piacentini, A. Salin.
2	205	AAID	COLLRAD (Fortran). COLLRAD: a code for calculating the quasi—steady state population densities of excited states of hydrogen—like ions. G.J. Tallents.

Crystallography

3	305	AAQD	FIREBIRD 2 (Fortran). A program for the calculation of the positions of X—ray powder reflections. I.F. Ferguson, R.S. Fox, T.E. Hughes.

General Purpose

2	147	ABUO	FOURGEN (PL/1). FOURGEN: a fast Fourier transform program generator. J.A. Maruhn.
2	163	ACIE	SRNG (Fortran). Sequential random integer generator. C.T.K. Kuo, T.W. Cadman, R.J. Arsenault.
2	173	ACXB	RENYIF, RENYIT, TESKAC (Fortran). Algorithms for the Kac and Renyi tests. J.M.F. Chamayou.

Laser Physics

3	323	ACXC	PULSAMP (Fortran). PULSAMP: a program to predict the amplification of nano—second CO2 laser light pulses. S.A. Roberts, K. Smith.

Molecular Physics

2	199	ACWU	TANGO (Fortran). Multistate molecular treatment of atomic collisions in the impact parameter approximation. III — Integration of coupled equations and calculation of transition amplitudes for Coulomb trajectories. R.D. Piacentini, A. Salin.

Nuclear Physics

2	237	ABIH	PIPIT (Fortran). PIPIT: a momentum space optical potential code for pions. R.A. Eisenstein, F. Tabakin.

Nuclear Physics (cont.)

Issue Page Cat.no.

3 277 AAUR ONCPLT (Fortran). A program for calculating the observables for single—particle—inclusive production reactions. K.J.M. Moriarty, J.H. Tabor. Subroutine required by this program is AAUN 9(1975)85.

3 293 ABMU SATTNT—FOR—EFR—MICRO—DWBA (Fortran). Exact—finite—range microscopic calculations for heavy—ion induced two—nucleon transfer reactions. D.H. Feng, B.T. Kim, T. Udagawa, T. Tamura, K.S. Low.

3 335 ACIB 0001 CALCULATE LATERAL RANGES (Fortran). Adaptation of a program for depth distribution of energy deposition by ion bombardment: calculation of ion lateral ranges. I. Manning, M. Rosen, J.E. Westmoreland.

3 339 ACIB 000ACORRECTION 21/09/75 (Fortran). Depth distribution of energy deposition by ion bombardment. I. Manning, G.P. Mueller.

3 339 ACIB 000BCORRECTION 5/03/75 (Fortran). Depth distribution of energy deposition by ion bombardment. I. Manning, G.P. Mueller.

Plasma Physics

2 205 AAID COLLRAD (Fortran). COLLRAD: a code for calculating the quasi—steady state population densities of excited states of hydrogen—like ions. G.J. Tallents.

2 213 ABUP GLOWCODE (Fortran). GLOWCODE: a one—dimensional code for the simulation of plasma afterglows. J.W. Long, A.A. Newton, M.C. Sexton. Subroutine required by this program is ABUF 7(1974)245.

2 231 ACXA AFER (Fortran). Calculation of the energy response of a spectrometer. J. Lotrian, M. Leriche, J. Cariou.

Radiation Physics

3 335 ACIB 0001 CALCULATE LATERAL RANGES (Fortran). Adaptation of a program for depth distribution of energy deposition by ion bombardment: calculation of ion lateral ranges. I. Manning, M. Rosen, J.E. Westmoreland.

3 339 ACIB 000ACORRECTION 21/09/75 (Fortran). Depth distribution of energy deposition by ion bombardment. I. Manning, G.P. Mueller.

3 339 ACIB 000BCORRECTION 5/03/75 (Fortran). Depth distribution of energy deposition by ion bombardment. I. Manning, G.P. Mueller.

Radiative Transfer

2 231 ACXA AFER (Fortran). Calculation of the energy response of a spectrometer. J. Lotrian, M. Leriche, J. Cariou.

Solid State Physics

2 179 ACWY KCOUL1 (Algol). Coulomb coefficients for complex ionic crystals. D.C. Sutherland, W.G. Ferrier.

3 335 ACIB 0001 CALCULATE LATERAL RANGES (Fortran). Adaptation of a program for depth distribution of energy deposition by ion bombardment: calculation of ion lateral ranges. I. Manning, M. Rosen, J.E. Westmoreland.

3 339 ACIB 000ACORRECTION 21/09/75 (Fortran). Depth distribution of energy deposition by ion bombardment. I. Manning, G.P. Mueller.

3 339 ACIB 000BCORRECTION 5/03/75 (Fortran). Depth distribution of energy deposition by ion bombardment. I. Manning, G.P. Mueller.

AUTHOR INDEX OF VOLUME 12

Issue	*Page*		
3	261	I.H. Aldeen	The calculation of eigenvalues and eigenfunctions in an asymptotically Coulomb potential.
3	261	A.C. Allison	The calculation of eigenvalues and eigenfunctions in an asymptotically Coulomb potential.
2	135	K. Appert	Finite element approximation for the wave—particle interaction in weakly turbulent plasmas.
2	163	R.J. Arsenault	Sequential random integer generator.
3	267	R.Ch. Baas	Computer analysis of experimental results on differential scattering of electrons by gases.
1	81	A. Bers	Symbolic computation of nonlinear wave interactions on MACSYMA.
1	vii	D. Biskamp	Preface.
1	67	J.P. Boris	Numerical solution of continuity equations.
1	109	J.P. Boujot	Computation of Tokamak transport.
1	21	O. Buneman	The advance from 2D electrostatic to 3D electromagnetic particle simulation.
2	163	T.W. Cadman	Sequential random integer generator.
2	231	J. Cariou	Calculation of the energy response of a spectrometer.
2	173	J.M.F. Chamayou	Algorithms for the Kac and Renyi tests.
2	237	R.A. Eisenstein	PIPIT: a momentum space optical potential code for pions.
3	293	D.H. Feng	Exact—finite—range microscopic calculations for heavy—ion induced two—nucleon transfer reactions.
3	305	I.F. Ferguson	A program for the calculation of the positions of X—ray powder reflections.
2	179	W.G. Ferrier	Coulomb coefficients for complex ionic crystals.
3	305	R.S. Fox	A program for the calculation of the positions of X—ray powder reflections.
1	121	E. Graham	Convection in stars.
1	45	R.C. Grimm	Recent developments in the computational aspects of MHD stability.
3	305	T.E. Hughes	A program for the calculation of the positions of X—ray powder reflections.
3	261	M.J. Jamieson	The calculation of eigenvalues and eigenfunctions in an asymptotically Coulomb potential.
3	267	R.H.J. Jansen	Computer analysis of experimental results on differential scattering of electrons by gases.
1	45	J.L. Johnson	Recent developments in the computational aspects of MHD stability.
1	81	C.F.F. Karney	Symbolic computation of nonlinear wave interactions on MACSYMA.
3	293	B.T. Kim	Exact—finite—range microscopic calculations for heavy—ion induced two—nucleon transfer reactions.

Issue	*Page*		
1	81	J.L. Kulp	Symbolic computation of nonlinear wave interactions on MACSYMA.
2	163	C.T.K. Kuo	Sequential random integer generator.
1	33	K. Lackner	Computation of ideal MHD equilibria.
2	231	M. Leriche	Calculation of the energy response of a spectrometer.
2	213	J.W. Long	GLOWCODE: a one—dimensional code for the simulation of plasma afterglows.
2	231	J. Lotrian	Calculation of the energy response of a spectrometer.
3	293	K.S. Low	Exact—finite—range microscopic calculations for heavy—ion induced two—nucleon transfer reactions.
3	335	I. Manning	Adaptation of a program for depth distribution of energy deposition by ion bombardment: calculation of ion lateral ranges.
3	339	I. Manning	Erratum notice. Depth distribution of energy deposition by ion bombardment.
2	147	J.A. Maruhn	FOURGEN: a fast Fourier transform program generator.
1	109	C. Mercier	Computation of Tokamak transport.
3	277	K.J.M. Moriarty	A program for calculating the observables for single—particle—inclusive production reactions.
1	99	K.W. Morton	Finite difference and finite element methods.
3	339	G.P. Mueller	Erratum notice. Depth distribution of energy deposition by ion bombardment.
2	213	A.A. Newton	GLOWCODE: a one—dimensional code for the simulation of plasma afterglows.
2	145	A.D. Payne	Comment on the use of FORMAC73 in general relativity.
1	9	M. Petravic	Numerical modelling of pulsar magnetospheres.
2	199	R.D. Piacentini	Multistate molecular treatment of atomic collisions in the impact parameter approximation. III — Integration of coupled equations and calculation of transition amplitudes for Coulomb trajectories.
3	323	S.A. Roberts	PULSAMP: a program to predict the amplification of nano—second CO2 laser light pulses.
3	335	M. Rosen	Adaptation of a program for depth distribution of energy deposition by ion bombardment: calculation of ion lateral ranges.
2	199	A. Salin	Multistate molecular treatment of atomic collisions in the impact parameter approximation. III — Integration of coupled equations and calculation of transition amplitudes for Coulomb trajectories.
2	213	M.C. Sexton	GLOWCODE: a one—dimensional code for the simulation of plasma afterglows.
2	125	V.B. Sheorey	Double Chebyshev expansions for wave functions.
3	323	K. Smith	PULSAMP: a program to predict the amplification of nano—second CO2 laser light pulses.
2	179	D.C. Sutherland	Coulomb coefficients for complex ionic crystals.
2	237	F. Tabakin	PIPIT: a momentum space optical potential code for pions.
3	277	J.H. Tabor	A program for calculating the observables for single—particle—inclusive production reactions.
2	205	G.J. Tallents	COLLRAD: a code for calculating the quasi—steady state population densities of excited states of hydrogen—like ions.

Issue	*Page*		
3	293	T. Tamura	Exact—finite—range micróscopic calculations for heavy—ion induced two—nucleon transfer reactions.
2	135	T.M. Tran	Finite element approximation for the wave—particle interaction in weakly turbulent plasmas.
1	1	W. Tscharnuter	The formation of protostars.
3	293	T. Udagawa	Exact—finite—range microscopic calculations for heavy—ion induced two—nucleon transfer reactions.
2	135	J. Vaclavik	Finite element approximation for the wave—particle interaction in weakly turbulent plasmas.
1	109	F. Werkoff	Computation of Tokamak transport.
1	53	J.A. Wesson	Non—linear behaviour of hydromagnetic instabilities.
3	335	J.E. Westmoreland	Adaptation of a program for depth distribution of energy deposition by ion bombardment: calculation of ion lateral ranges.
